

V-TAPER AESTHETIC

Push / Pull / Legs / Abs / Upper / Lower — 6-Day Plan

Fat loss • Muscle preservation • V-taper focus • Modified from the original PPL split

Day 1	Day 2	Day 3	Day 4	Day 5	Day 6	Day 7
Push Chest / Front & Side Delts / Tri	Pull Back Width / Rear Delts / Biceps	Legs Quads / Hams / Calves	Abs Core / Direct Ab Work + LISS	Upper Shoulders / Chest / Back / Arms	Lower Deadlift / Glutes / Side Delt Finisher	Rest

What Changed From The Original PPL Plan

- Day 4 (previously Push B) is now a dedicated **Abs** day — direct core work + LISS cardio, no heavy oblique loading.
- Day 5 (Upper) merges the best of the old Push B + Pull B — keeps side delts at 3x/week and rear delts at 2x/week.
- Day 6 (Lower) keeps deadlifts + the side delt finisher, and now carries the **only** weekly trap work (shrugs), since the old Pull B slot is gone.
- Side delts still trained 3x/week (Push, Upper, Lower) — same frequency as the original plan.
- Rear delts still trained 2x/week (Pull, Upper). Waist-narrowing principle (minimal obliques) preserved on the Abs day.

DAY 1 — PUSH

Chest • Front/Side Delts • Triceps

Goal: Build upper chest width and side delt sweep

Exercise	Sets	Reps	Form Cue
★ Incline Dumbbell Press	4	8-10	Bench at 30-45°. Lower dumbbells to chest sides, press up in an arc. Squeeze at top.
Flat Barbell Bench Press	3	8-10	Retract scapula, drive feet, touch lower chest. Explosive press.
★ Dumbbell Lateral Raise	4	12-15	KEY V-TAPER. Slight bend in elbows, raise to shoulder height, lead with elbows. Control the negative.
★ Cable Lateral Raise	3	15-20	Lean away from cable machine, pull cable across body. Constant tension. High reps for burn.
Overhead Triceps Extension	3	10-12	DB or cable. Elbows pointed up, lower behind head, extend fully.
Triceps Pushdown	3	12-15	Rope or straight bar. Elbows pinned, push down and out. Squeeze at lockout.

DAY 2 — PULL

Back Width • Rear Delts • Biceps

Goal: Widen lats, build rear delts for a 3D shoulder look

Exercise	Sets	Reps	Form Cue
★ Weighted Pull-Ups	4	6-10	#1 V-TAPER EXERCISE. Wide overhand grip, pull to upper chest, slight lean back. Control descent.
Lat Pulldown (Wide Grip)	3	10-12	If pull-ups incomplete. Wide pronated grip, pull to upper chest, squeeze lats.
Straight Arm Pulldown	3	12-15	Cable, slight lean forward, arms straight, pull to thighs. Isolates lats.
★ Face Pull	4	15-20	KEY V-TAPER. Rope at upper chest height, pull to face, externally rotate. Rear delt + posture.
★ Reverse Pec Deck	3	12-15	Rear delt isolation. Chest on pad, squeeze arms back, hold peak contraction.
Barbell Curl	3	10-12	Shoulder-width grip, keep elbows pinned, curl to shoulders. Squeeze.

DAY 3 — LEGS

Quads • Hams • Calves

Goal: Build the foundation while keeping the waist narrow

Exercise	Sets	Reps	Form Cue
Barbell Squat / Leg Press	4	8-12	Squat: break at hips/knees together, chest up, depth to parallel. Alternative: Leg Press.
Romanian Deadlift	3	10-12	Hinge at hips, slight knee bend, slide bar down shins. Feel hamstring stretch.
Leg Extension	3	12-15	Pause at top, control negative. Pre-exhaust quads.
Leg Curl	3	12-15	Curl weight toward glutes, hold top squeeze.
Standing Calf Raise	4	12-15	Full range of motion, pause at top, stretch at bottom.

DAY 4 — ABS

Core / Direct Ab Work — NEW DEDICATED DAY

Goal: Direct core training without adding oblique bulk — keeps waist narrow, plus a fat-loss cardio finisher

Exercise	Sets	Reps	Form Cue
Hanging Leg Raise	4	12-15	Controlled raise, avoid swinging. Curl pelvis at top for full ab contraction.
Cable Crunch	3	15-20	Kneel facing cable, round spine, crunch down using abs (not hips).
Plank (weighted optional)	3	Failure	Neutral spine, brace core hard, don't let hips sag or pike.
Dead Bug	3	12-15	Keep low back pressed into floor. Slow, controlled opposite arm/leg extension.
Toe Touches	3	15	Slow and controlled, reach toward toes, feel upper abs contract.
LISS Cardio (incline walk / bike)	1	15-20 min	Fat-loss finisher. No oblique twisting movements — keep it straight-line.

DAY 5 — UPPER

Shoulders • Chest • Back • Arms

Goal: Second side-delt + rear-delt hit of the week, full upper-body density

Exercise	Sets	Reps	Form Cue
Overhead Press (DB or Barbell)	4	8-10	Full delt development. Standing or seated. Bar path around face. Core tight.
Bent Over Barbell Row	4	8-10	45° hinge, pull bar to lower chest. Squeeze mid-back. Explosive pull, slow negative.
★ Cable Y-Raise	3	15	Low pulley, raise arms in a Y pattern. Hits side + front delt tie-in.
★ Rear Delt Fly (DB or Machine)	3	12-15	Bent over with DB or pec deck. Squeeze rear delts, don't use traps.
Skull Crushers (Lying Triceps Ext)	3	10-12	EZ bar or DB. Lower to forehead, elbows fixed. Keep upper arms vertical.
Hammer Curl	3	10-12	Neutral grip, brachialis focus. Elbows pinned.

DAY 6 — LOWER

Deadlift • Glutes • Side Delt Finisher • Traps

Goal: CNS work, hamstring/glute development, third weekly side-delt hit — now carries the week's only trap work

Exercise	Sets	Reps	Form Cue
Conventional Deadlift	3	5	CNS focus, traps + back + whole body. Reset each rep. Perfect form > weight.
Bulgarian Split Squat	3	10-12/leg	Back foot on bench. Quads + glutes. Core stability.
Leg Curl	3	12-15	Hamstring finisher.
★ Lean-Away Cable Lateral Raise	4	15-20	Side delt finisher. Lean away from cable, raise across body. Burns.
★ Dumbbell Shrug	3	12-15	Traps widen upper body — kept to 1x/week to avoid narrowing shoulder look. Straight up, hold 1 sec at top.

V-TAPER KEY PRINCIPLES

- ✓ **Side Delts 3x/Week** — They recover fast and respond to high volume. Trained on Push, Upper, and Lower days.
- ✓ **Lats Over Rows** — Prioritize vertical pulls (pull-ups, lat pulldowns) over horizontal rows for width.
- ✓ **Rear Delts 2x/Week Minimum** — Makes shoulders look full from every angle. Don't skip face pulls.
- ✓ **Traps 1x/Week** — Now isolated to the Lower day only. Big traps can visually narrow shoulders — train for balance, not more.
- ✓ **Minimize Oblique Training** — No heavy side bends, weighted Russian twists, or suitcase carries. Keep the waist narrow, even on the dedicated Abs day.
- ✓ **Neck Training** — Optional: neck harness 1x/week adds to the V-taper illusion from the front.
- ✓ **Cardio for Fat Loss** — 15-20 min LISS on Abs day, plus optional 1-2 more sessions across the week.
- ✓ **Progressive Overload on a Cut** — Add 2.5-5 lbs or 1 rep per week. Maintaining strength = maintaining muscle in a deficit.

MONTHLY PROGRESSION TEMPLATE

Week	Approach
1	Find working weights — stop 2 reps shy of failure. Focus on form.
2	Push to 1 rep shy of failure on the last set of each exercise.
3	Push every set to 0-1 RIR (Reps In Reserve).
4	DELOAD — Drop weight 30-40%, same reps, or take 4-5 full rest days.
